

ACCESSING THE COMMAND CENTER

-Print out a status page from the machine

(System Menu->Report->Report Print->Status Page)

-On the Status Page, find the network section. It will list out an IP address under the IPv4 settings.

-Type the IP address directly into the URL of a web browser(preferably Microsoft Edge)

-Advanced-> Proceed to IP address

-Login in to the Command Center using Admin login

(Username/Password - Admin/Admin)

Black	93%

Accessing the Command Center on a 1 series machine

Load the IP address as Internet Explorer

- Go to Microsoft Edge Browser settings
- Default Browser tab
- Let IE open sites in Microsoft Edge ->Always
- Allow sites to be reloaded in IE mode -> Allow
- Reload Microsoft Edge once settings have been applied
- Input IP address into URL
- Right Click on the open tab, or click the settings icon and reload tab in Internet Explorer mode

The screenshot shows the Microsoft Edge Settings interface. On the left, there's a sidebar with various settings categories like Profiles, Privacy, Appearance, etc. The 'Default browser' section is currently selected, showing that 'Microsoft Edge is your default browser' and a 'Make default' button. Below this, the 'Internet Explorer compatibility' section is visible, featuring a logo of the Internet Explorer globe and text about opening legacy sites. It includes three main options: 'Let Internet Explorer open sites in Microsoft Edge' (set to 'Always (Recommended)'), 'Allow sites to be reloaded in Internet Explorer mode (IE mode)' (with an 'Allow' button), and 'Internet Explorer mode pages' (with an 'Add' button). The 'Internet Explorer mode pages' section notes that pages will open in Internet Explorer mode for 30 days from the date added.
